

## E-INDIA FLEXIPACK MACHINERY PRIVATE LIMITED

**Add. 1 :** GF A-3, Maruti Plaza Residency, Near Satymev Hospital, Chandkheda, Ahmedabad-382424

**Add. 2 :** Ground Floor, Plot No 24/18-A, Kh. No. 487, Munirka Kunj, Najafgarh, New Delhi - 110043

### **Friction Tape / Rubber Cork:**

Benefits and Applications for Industrial Use Friction tape / Rubber Cork is a cost-effective alternative to rollers with non-stick coatings or rubber coatings. It prevents sensitive strip products from being damaged after contact with rollers. Some of the specific benefits of friction tape include

**Cost-Effectiveness:** Friction tape is an affordable alternative to more complex and expensive coated rollers, making it a popular choice for businesses on a budget.

**Ease of Use:** Easy to apply and remove, making it a convenient option for quick repairs or maintenance.

**Durability:** Made of a strong, high-friction material that can withstand frequent use, ensuring long-lasting protection of sensitive products.

**Versatility:** Comes in various widths, thicknesses, and roll lengths, making it suitable for a wide range of industrial applications.

**Protective:** Helps to prevent sensitive products from being damaged after contact with rollers, ensuring an efficient production process. In comparison, non-stick coatings and rubber coatings can be more expensive, harder to apply, and not as versatile as friction tape. Additionally, these coatings may need to be reapplied or replaced, increasing the total cost and time required for maintenance.

The properties and characteristics For the friction tape that make it a good choice for preventing sensitive products from being damaged include:

**High Friction Coefficient:** Friction tape has a high friction coefficient, which helps to grip and hold sensitive products in place as they pass over rollers or other surfaces. This reduces the risk of slipping or damage to the product during the production process.

**Strong Adhesion:** Has strong adhesive properties, which help it to adhere to the surface of rollers or other equipment. This ensures that the tape stays in place and provides continuous protection to sensitive products.

**Durability:** Made of a durable material that can withstand frequent use and heavy loads. This means it can provide long-lasting protection to sensitive products and other equipment, thereby reducing the need for frequent repairs or maintenance.

**Easy to Apply:** Easy to apply and remove, making it a convenient solution for protecting sensitive products. Simply cut the tape to the desired length, remove the protective paper, and apply it to the surface of rollers or other equipment.

### End Product Applications:

- Steering Rollers for Web Guiders
- Slitting Machines
